Introduction

This document contains specific instructions on the use of Digital Waste Shipment System. In order to properly explain how certain operations work, this document often refers to the EU legislation concerning shipments of waste, to illustrate how certain requirements are reflected in DIWASS. This document does not contain any interpretation of these laws.

Abbreviations used in the document:

Abbreviation	Meaning
CA	Competent Authority
DIWASS	Digital Waste Shipment System
WSR	Waste Shipment Regulation: Regulation (EU) 2024/1157 of the European Parliament and of the Council of 11 April 2024 on shipments of waste, amending Regulations (EU) No 1257/2013 and (EU) 2020/1056 and repealing Regulation (EC) No 1013/2006, <i>OJ L</i> , 2024/1157, 30.4.2024, <i>ELI</i> : http://data.europa.eu/eli/reg/2024/1157/oj
DIWASS Implementing Act	Commission Implementing Regulation (EU) 2025/1290 of 2 July 2025 laying down rules for the application of Regulation (EU) 2024/1157 of the European Parliament and of the Council as regards the requirements necessary for the interoperability between the central system for the electronic submission and exchange of information and documents related to shipments of waste and other systems or software, as well as other technical and organisational requirements necessary for the practical implementation of such electronic submission and exchange of information and documents, <i>OJ L</i> , 2025/1290, 14.7.2025, <i>ELI</i> : http://data.europa.eu/eli/reg_impl/2025/1290/oj

Chapter 1 Submitting the notification

General note

This chapter provides instructions on submitting a notification in DIWASS. To be able to submit a notification, it is necessary that:

- The operator that will act as a notifier is registered in DIWASS¹,
- The user is authorised to represent the operator that will act as a notifier in DIWASS²,
- All operators that are involved in notification are registered in DIWASS.

Please note that the user acting in DIWASS is always representing a given operator, and that this operator acts in a certain role in the context of shipments of waste. The role in a given notification is established through the selection of the operator in one of the fields of the notification (e.g. notifier, carrier, treatment facility, etc).

Example: user Anna Smith represents the company Waste Management S.A. that is registered as an operator, and that in the context of a given notification acts as a notifier.

To improve the readability of the instructions below, instead of using the formula “user representing the operator that in the context of given shipment acts as [...]”, references are to the simpler form “the user”.

Please also note that, for cases where waste is imported into the EU and the third country operator acting as the notifier does not actively use DIWASS, the notification will be introduced to DIWASS by an EU CA, which in context of that notification, is to act as CA of dispatch.

Specific instructions

1. After logging in into TRACES NT, the user needs to select in the tab “**Documents**” the “**DIWASS Notification procedure**”.

¹ For registration of operators, please refer to Chapters 1, 2 and 4 of the instruction manual on Operators [for operators and CAs].

² For authorisation of users to represent operators, please refer to Chapters 3 and 5 of the instruction manual on Operators [for operators and CAs].

- The screen with a list of notifications, where the operator that user represents is involved, will be displayed. To create a new notification, the user should select the button **“Create”**.

- A notification wizard will be opened, and the user will be asked to select the notifier. To do this, please select the operator from the operators that you are authorised to represent in DIWASS, that you will prepare the notification for. This selection needs to be made also in cases where the user is authorised to represent only one operator in DIWASS. The selection should be done by selecting a name of respective operator from the drop-down list.

Confirm the selection by clicking **“Next”**.

Select the notifier

WeSolveYourIssueZ

address

Postal Code: 9473 City: Erembodegem

Street: Recyclagedreef 22

Contact Information

Telephone Number: +320000000

Operator's identifiers

National Company Register*: XYZABC123

EORI: BE1111111111

Next Cancel

- The user needs to indicate the countries and CAs for the notification from the drop-down lists provided. To add transit countries, the user needs to first click on “+ Add Transit”. In case a notification involves more than one transit country, please list them in the correct order by using arrows next to the names of CAs of transit.

Confirm the selection by clicking “Next”.

STEP 1 - SELECT THE NOTIFIER

STEP 2

Select countries and competent authorities

Dispatch * Belgium (BE) (BE002)IBGE-BIM Waste Shipment

Transit * France (FR) (FR1234)FR EUDR Test Authority

Transit *

Destination * Germany (DE) (DE027)Regierung von Niederbayern

Mandatory *

Previous Next Cancel

Please note that that DIWASS will not block the possibility to submit a notification starting from country A if the notifier does not have a registered office in country B.

However, many Member States require that the notifier has to have a registered office in their country in order to submit a notification starting from that country, and therefore may object to such a shipment of waste initiated by a notifier not having a registered office in the territory of their country. Therefore in such cases the notifiers are advised to check if the Member State selected as country of dispatch requires the notifier to have a registered office in their territory before submitting notification.

The screen will now display a summary of the data provided so far, and the user will be asked to confirm the selections made by clicking “**Confirm**”. Based on this data, the template of the notification will be created, and the remaining elements of notification documents can then be filled in in the next steps.

Please note that, in that draft notification, it will not be possible to change the elements concerning notifier, countries and CAs involved. When changes are needed on those elements, a new draft notification needs to be created. It is possible – before confirming – to return to previous screens through the button “Previous”.

When the button “Cancel” is clicked here, the process of drafting the notification will be terminated.

Confirm Notification Data

Step 1 - Select the notifier - **WeSolveYourIssueZ**
Step 2 - Select countries and competent authorities -

	(a) Countries/States concerned	(b) code No of competent authorities where applicable
Dispatch	🇧🇪 (BE) Belgium	BE002 - IBGE-BIM Waste Shipment
Transit	🇫🇷 (FR) France	FR1234 - FR EUDR Test Authority
Destination	🇩🇪 (DE) Germany	DE027 - Regierung von Niederbayern

Step 3 - Confirm Notification Data -

Warning: If you click "CONFIRM", the system will generate the draft template of notification document based on the information provided in steps 1-3. It will not be possible to change this data afterwards. To change these elements, a new notification document will need to be created.

[Previous](#) [Confirm](#) [Cancel](#)

22 * Mandatory

- After confirming in the notification wizard, the main screen of the notification will open. Users will be able to save a draft notification at this stage, and it is recommended to do so at this stage. To do so, please click on **“Save”** at the bottom right corner of the page.

7. **Box 3. “Notification No.”:** The system will generate a unique notification number after a draft is saved for the first time. There is thus no need for the user to introduce such number manually.

[Please note that the Commission works on providing a functionality to allow the EU CA that submits all relevant information to the system pursuant to Article 51(2) point (b), Article 53(2) point (d), Article 57 or Article 58(1) and (2) of the WSR to introduce in the system that the user uses the notification number attributed by the CA of dispatch³].

In box 3, the user should specify if the notification that the user creates is linked with another notification document or Annex VII document. The user can indicate this by providing the number of such related document.

The user may indicate the link with another notification or Annex VII document where:

- The new notification seeks to continue shipments of waste that were consented to before (i.e. the same type of waste, the same notifier/waste producer(s), the same destination facility, etc.).
- The notification is created due to a take-back of waste covered by another notification or Annex VII document.

The user should also specify the following:

- Whether the new notification is created due to take back, and
- Whether it is created in the context of the detection of illegal activities.

Choosing these options will have impact on the possibility to complete box 3a of the notification document.

³ See also Article 15(4) of DIWASS Implementing act.

11

The user should also indicate whether the notification concerns:

- Individual or multiple shipment of waste: the user should indicate “Yes” if the notification concerns one shipment of waste only, and “No” if the user intends to submit a general notification,
- Shipment of waste destined for disposal or recovery, and
- Shipment of waste destined for pre-consented facilities (see Article 14 WSR).

Choices made on the first two elements above will have impact on the possibility to complete boxes 4 and 10 of the notification document.

Indicating that the shipment of waste is destined for a pre-consented facility will impact the expected time for the CAs to ask for additional information, consider notification properly carried out and properly completed, as well as the timeline for providing the decision.

Please note that DIWASS will allow to select that a shipment is destined to pre-consented facility only if the facility is listed as such facility in DIWASS.

The screenshot displays two sections of a web form. The left section, titled '3. Notification No.', contains a text input field for the notification number, followed by a section 'This notification is created:' with radio buttons for 'in relation with notification no or Annex VII no:', 'due to take-back', and 'due to detection of illegal shipment of waste'. Below this is 'This notification concerns:' with radio buttons for 'Individual shipment of waste', 'Destined for' (with sub-options 'Disposal' and 'Recovery'), and 'Shipment of waste destined for pre-consent recovery facility'. The right section, titled '3.1. Address of the location from which the shipment starts', has radio buttons for 'Custom address' (selected) and 'Operator's address', a dropdown menu, and a text input field. Below this are sections '4. Total Intended Number of Shipments' and '5. Total intended quantity of waste to be shipped' with text input fields and a '+ Add' button.

8. **Box 3.1. “Address of the location from which the shipment starts”:** The user needs to indicate the address of the location from which the shipment starts.

The user will be able to select the address of the location from which the shipment starts as one of the address of operators (notifier or waste producers) involved in this notification from the drop-down list.

The user will be able to select “**Custom address**” and provide the address of the location from which the shipment starts in the free text box in case it is different from the address of the operators involved in a given notification.

If the shipment starts from the address of one of the waste producers, the user needs to first add waste producers in box 9 of the notification document, and only then will they be able to indicate the address of the relevant waste producer.

If the address of the location from which the shipment starts is not the same as the address of any of the operators that is displayed in DIWASS, please note that the shipment may concern not the selected operator, but its site. Please refer to Chapters 6 of the instruction manual on Operators [for operators and CAs].

Please note that in case the notification concerns multiple shipments of waste, the address indicated in this box will be fixed for all movement documents created under this notification.

The screenshot shows the '3. Notification No.' section on the left and '3.1. Address of the location from which the shipment starts' on the right. In the '3.1' section, 'Shipment of waste starts from' has two radio buttons: 'Custom address' (unselected) and 'Operator's address' (selected). Below this is a dropdown menu showing a list of addresses. The '4. Total Intended Number of Shipments' section is empty. The '5. Total intended quantity of waste to be shipped' section has a '+ Add' button.

9. **Box 4. “Total Intended Number of Shipments”:** In case the notification concerns multiple shipments of waste, the user needs to indicate the total intended number of shipments of waste by completing the box.

The screenshot shows the same form as before, but in the '3.1. Address of the location from which the shipment starts' section, the 'Custom address' radio button is now selected. The dropdown menu is empty. The '4. Total Intended Number of Shipments' section is highlighted with a green box and is currently empty. The '5. Total intended quantity of waste to be shipped' section remains the same with the '+ Add' button.

This number will define the maximum number of movement documents that could be submitted under this notification in DIWASS. Please note that this number may be decreased as a result of the CA's decision and/or specific condition for consenting to the shipment of waste.

Please also note that if a movement document is cancelled by the notifier, it will not affect the number of movement documents that could be generated under a consented notification.

Example: Consented notification allows for 15 shipments of waste, so DIWASS will allow to submit 15 movement documents. If the notifier cancels movement document bearing

serial number 013, DIWASS will allow to generate and submit movement document with serial number 016.

10. **Box 5. “Total intended quantity of waste to be shipped”**: The user needs to provide the total intended quantity of waste to be shipped under the notification either by indicating the mass of waste, in tonnes, or the volume of waste, in m³. Please click on “**Add**” and select volume or mass.

This notification concerns:

Individual shipment of waste ☐ Yes ☒ No

Destined for ☐ Disposal ☒ Recovery

Shipment of waste destined for pre-consent recovery facility ☐ Yes ☒ No

5. Total intended quantity of waste to be shipped

+ Add

Volume

Mass

Then, please indicate the correct value of mass or volume by filling in a free text box:

This notification concerns:

Individual shipment of waste ☐ Yes ☒ No

Destined for ☐ Disposal ☒ Recovery

Shipment of waste destined for pre-consent recovery facility ☐ Yes ☒ No

5. Total intended quantity of waste to be shipped

Mass: Value: 2500 Unit: Tonnes (Mg) + Add

This quantity will define the maximum total quantity of waste to be shipped under all the movement documents generated by the notifier in DIWASS under this notification. Please note that this quantity may be decreased as a result of the CA's decision and/or specific condition for consenting to the shipment of waste.

Please note that the choice made in this box will affect the possibility of providing data in the movement documents generated based on notification.

Example: if the notifier provided the total intended quantity of waste in Mg in notification document, in movement documents the notifier will be able to provide quantity only in Mg (and not in m³).

Please also note that DIWASS will check the total intended quantity of waste to be shipped against the data that the notifier provides in box 5 of the movement documents generated based on the notification.

Please also note, that DIWASS will not restrict the waste receiving facility to provide different values, including higher ones, in box 17 of the movement document.

11. **Box 6. “Intended period of time for shipment(s)”**: The user needs to indicate the intended period for shipments by providing the dates of intended first departure and last departure. To select these dates, the user should click on the **calendar icon** and select the respective dates.

10.2. Subsequent Interim or non-interim waste treatment facility located in the same country as the country of destination

+ Add

Name	Main identification number	E-mail	Address	Country	Facility type	Actions
------	----------------------------	--------	---------	---------	---------------	---------

16. Box 10.1. “Subsequent Interim or non-interim waste treatment facility located in another country than the country of destination”: To add facilities in this box, please follow the steps as described for adding the facility in box 10 of notification.

The notifier needs to add all such facilities into this box. The facilities will not be able to contribute to any elements of the notification document or movement documents generated on its basis, but it will be able to see it. The details related to connection between the facility indicated in box 10, and facilities indicated in box 10.1 should be explained in attachments (i.e. including types of waste and treatment processes, that facilities listed in box 10.1 should perform).

17. **Box 10.2. “Subsequent Interim or non-interim waste treatment facility located in the same country as the country of destination”:** To add facilities in this box, please follow the steps as described for adding the facility in box 10 of notification.

The notifier needs to add all such facilities into this box. The facilities will not be able to contribute to any elements of the notification document or movement documents generated on its basis, but it will be able to see it. Also, the facilities will be able to submit certificates confirming completion of a subsequent interim or non-interim recovery operation or a subsequent interim or non-interim disposal operation in accordance with Article 15(5) of the WSR⁴.

18. **Box 11. “Disposal / Recovery operations”:** The user needs to choose the code of waste treatment operation(s), by clicking “+ Add” and selecting the relevant operations. Then, the user should describe the technology employed and reasons for export by filling in the free text boxes.

11. Disposal / Recovery operations

D-code / R-code: + Add

Technology employed:

Reason for export:

12. Designation and composition of the waste

R1 Use as a fuel (other than in direct incineration) or other means to generate energy (Basel/OECD) - Use principally as a fuel or other means to generate energy (EU)

R2 Solvent reclamation/regeneration

R3 Recycling/reclamation of organic substances which are not used as solvents

R4 Recycling/reclamation of metals and metals compounds

R5 Recycling/reclamation of other inorganic materials

R6 Regeneration of acid or bases

R7 Recovery of components used for pollution abatement

R8 Recovery of components from catalysts

R9 Used oil re-refining or other reuses of previously used oil

R10 Land treatment resulting in benefit to agriculture or ecological improvement

R11 Uses of residual materials obtained from any of the operations numbered R1-R10

R12 Exchange of wastes for submission to any of the operations numbered R1-R11

R13 Accumulation of material intended for any operation in this list

13. Physical characteristics

Physical characteristics:

Description:

Please note that the selection of codes of waste treatment operations and description of technologies should concern only the waste treatment facility indicated in box 10 of the notification, not the subsequent facilities indicated in boxes 10.1 or 10.2.

19. **Box 12. “Designation and composition of the waste”:** The user should describe the designation and composition of waste by filling out the free text box.

⁴ Please see also Commission Delegated Regulation (EU) 2024/2571 of 19 July 2024 supplementing Regulation (EU) 2024/1157 of the European Parliament and of the Council by establishing the information to be provided in the certificate confirming the completion of a subsequent interim or non-interim recovery operation or a subsequent interim or non-interim disposal operation, OJ L, 2024/2571, 27.9.2024, ELI: http://data.europa.eu/eli/reg_del/2024/2571/oj

12. Designation and composition of the waste

20. **Box 13. “Physical characteristics”**: The user needs to choose the physical characteristics of waste concerned by this notification by clicking “+ Add” and selecting the relevant description from the drop-down list. The user may describe these characteristics by filling in the free text box.

13. Physical characteristics

21. **Box 14. “Waste identification”**: in this box, the user should identify the waste to be shipped under the notification.

To facilitate the selection of relevant waste codes, DIWASS incorporates the list of codes, so that the user can select them from the drop-down menu. DIWASS provides also a separate selection for “Main Waste Identification” and “Other Waste Identification”.

The “**Main Waste Identification**” incorporates the lists of waste codes as provided for in box 14 of the notification document, notably:

- Basel Annex VIII (or IX if applicable),
- OECD,
- EU list of waste,
- National code in country of export,
- National code in country of import,
- Other,
- Y-code,
- H-code,
- UN class,
- UN Number,
- UN Shipping name.

The user needs to click on “+ Add Main Identification” to select the type of waste identification list. The user should select the respective list by clicking on it. The user may choose one or more waste identification lists. If more than one waste code is present, click “+ Add Main Identification” the needed number of times.

14. Waste identification*

+ Waste code ▼

EU48

22. **Box 14.1 “Customs codes”:** The user should click on the green button “+ **Add custom code**”. Then, a pop-out window will be displayed where customs codes are grouped. The user needs to select the relevant code from these lists.

23. **Box 15. “Countries and points of exit and entry”:** The user should indicate the name of the border crossing or port as the point of entry to or exit from a particular country of dispatch and destination. For transit countries, the user should provide points of entry and exit. This information should be provided by filling in the free text boxes in column “specific points of exit or entry (border crossing or port)”.

15. countries and points of exit or entry

	Countries / States concerned	CA code (where applicable)	specific points of exit or entry (border crossing or port)	
State of export – dispatch	(BE) Belgium	BE002	Exit	
State of transit	(FR) France	FR1234	Entry	Exit
State of import – destination	(DE) Germany	DE027	Entry	

24. **Box 16. “Customs offices of entry and/or exit and/or export (European Union)”:** For notifications involving a “third country element”, i.e. covering:

- Export of waste from the EU/EEA Member States,
- Import of waste from the EU/EEA Member States,
- Transit of waste through the EU/EEA from and to third countries,
- Shipment of waste between EU/EEA Member States with transit via third countries,

The user should also indicate names of customs offices of entry and/or exit and/or export by filling in the free text boxes.

16. Customs offices of entry and/or exit and/or export (European Union)

Entry:	Exit:	Export:
Name	Name	Name
Alternative entry:	Alternative exit:	Alternative export:
Name	Name	Name

25. **Adding attachments:** To add attachments, the user needs to click “+ Add attachment”.

Attachments

+ Add attachment

Attachment type	File	Comment	Attachment contains personal data	Date	Action

Please note that in the attachments will be visible for: all CAs and all operators selected for a given notification, except for carriers.

Carriers will be granted access only to the attachments with the following labels:

- Decision,
- Handling Requirements,
- Intended Route and Alternative Route,
- Composition of waste,

It is therefore important for the notifier to correctly indicate the label describing the content of the attached document,

Carriers will get such access as soon as the notification is consented to by all CAs.

26. When the user has provided all the required information, it may authenticate the notification document before submission. This authentication process in DIWASS is an equivalent of signing the documents.

The authentication needs to be performed by the notifier, as well as all the waste producers listed in box 9 of the notification document.

Please note that the waste producers will not be able to edit the notification document. They will be able only to read and authenticate the document. Please also note that the waste producers should authenticate the last version of the notification document. Therefore, in case the notifier decides to change the draft notification document after the waste producer authenticated it, the waste producer would need to re-authenticate the draft notification document in order to allow for its submission.

In order to authenticate the notification document, the notifier needs to click on the button “Authenticate” at the bottom of the screen.

The screenshot shows the 'Attachments' section of the DIWASS interface. At the top, there is a header 'Attachments' with a plus icon. Below it is a table with the following columns: 'Attachment type', 'File', 'Comment', 'Attachment contains personal data', 'Date', and 'Action'. A button '+ Add attachment' is located in the top right corner of the table area. Below the table, there is a section for 'Number of attachments'. At the bottom of the page, there is a footer with links: 'Last update: 2025', 'Legal Notice', 'Terms of Use', 'Cookies', 'Privacy Statement', 'Accessibility', 'Credits', 'Contact', and 'Top Page'. Below these links, it says 'European Commission - DG Health & Food Safety.' and 'IMSOC - TRACES.NT 8.2.0-SNAPSHOT (12/12/2025 13:05:38) - processed by cls1.'. At the very bottom, there is a bar with a 'Close' button on the left, an 'Authenticate' button with a dropdown arrow in the center (highlighted with a green box), and 'View as PDF', 'Delete draft', and 'Save' buttons on the right.

In the pop-out window, the user should indicate what is the role they perform in the organisation of the operator (e.g. proxy, member of the board, president etc.). Then, the user should click on “**Confirm**”.

Authentication details

Name: Test USER Fourteen

Date: 17/12/2025

E-mail of the person authenticating the submission: env-testuser14@ec-traces.eu

Role of the person authenticating the submission on behalf of the operator in its organisation:

Confirm **Cancel**

The information on which operators authenticated the notification and when will be displayed in box 17 of the notification document.

17. Exporter's - notifier's / generator's - producer's declaration:

I certify that the information is complete and correct to my best knowledge. I also certify that legally-enforceable written contractual obligations have been entered into and that any applicable insurance or other financial guarantee is or shall be in force covering the transboundary movement.

No	Role	Operator's name	Name of the person authenticating the submission	Authentication date	Additional string
1	EXPORTER	WeSolveYourIssueZ	Test USER Fourteen	17/12/2025 - 14:16:30 CET	

27. When all the required authentications are performed, the user will be able to submit the notification by clicking on button **"Submit"** on the right bottom corner of the page.

Attachments

+ Add attachment

Attachment type	File	Comment	Attachment contains personal data	Date	Action
Number of attachments					

Close **Authenticate** **View as PDF** **Delete draft** **Save** **Submit**

Please note that, as soon as the notification document is submitted:

- The user can no longer edit the notification.
- The notification is automatically sent to CAs indicated by the notifier, that will be able to start resolving the notification.

The user will be able to edit the notification in case one of the CAs provides a request for additional information. Please see further information on that possibility in **Error! Reference source not found..**

28. After the notification document is submitted, the notification screen contains three tabs:

- Dashboard: summing up the developments for this notification.
- Notification: containing all the details of the notification document.
- Request for information: indicating all the requests for additional information provided by the CAs and whether they were replied to.

By clicking “**Print**” in the bottom right corner, the user can see and download a pdf version of the newly created notification.

BE0025000608i

SUBMITTED

Success:

Notification has been saved. Waste producers should authenticate the notification in order to allow the notifier to submit it. Please be aware that any change done by the notifier after the waste producer authenticated the notification would require that the waste producer authenticates the updated draft notification once again in order to allow for its submission.

Chapter 2 Reviewing the notification

General note

This chapter provides general instructions on reviewing the notification by operators. Please note that:

- The notifier and waste producers listed in the notification can see the notification as soon as draft notification is saved in DIWASS.
- Consignees and facilities listed in the notification, as well as CAs, will see the notification as soon as it is submitted.
- Carriers will see the notification document only when all CAs provide their consents.

The operators involved in the notification (except for carriers) will be able to monitor the progress related to the review of the notification by the CAs – after following the steps described in specific instructions. Please also note that notification document will be assigned with a specific status – see the table below describing such statuses.

Please also note that if, after reviewing a notification, the CA determines that it is not the appropriate CA to issue a decision – because the notifier has incorrectly selected it and another authority is in fact responsible – DIWASS does not allow the CA to transfer the notification to the correct authority. In such case, the CA can:

- Either contact the notifier outside DIWASS and inform them that the CA is not competent to assess the notification, indicate the appropriate CA where possible, and request that they cancel the current notification and submit a new one with the correct information, or
- Consider the notification invalid, and indicate to the notifier, outside DIWASS, the relevant CA for a given notification. The notifier will need to resubmit the notification, including the details of relevant CAs.

Please also note that DIWASS will display timelines for certain actions, as provided for in the WSR, but it will not block the possibility to perform the action in case the deadline is not complied with.

Please also see the general information on the statutes of notification document in the table below.

Table 1. Statuses of notification document in DIWASS

Status	When does the status start?	When does the status end?	Basic consequences of the status
DRAFT	Notifier saves a draft	Notifier submits the notification	Only notifier and waste producers listed in the notification can see the notification Notifier can update the notification until it is submitted ⁵
DELETED	Notifier deletes the draft notification	Not applicable	Notification is deleted and cannot be further changed or submitted
SUBMITTED	Notifier submits the notification (when data required in the notification document is inserted into the draft and draft is authenticated by notifier and all waste producers)	- Any of the indicated CAs invalidates the notification, or - Notifier cancels the notification, or - CA of dispatch considers notification properly carried out and all CAs of transit and CA of destination considered it properly completed	- All CAs indicated in the notification can see the document and start the review process (they can ask for additional information, consider it properly carried out, properly completed or invalid, as applicable) - Notifier cannot change the document (except for when there is an unanswered request for additional information) - Operators indicated in the notification can see the notification (except for carriers) - Notifier can cancel the notification
INVALID	Any CA listed in the notification clicks on "invalidate"	CA that invalidated the notification revalidates it	- Notifier cannot change anything in the notification⁶ - All the CAs can see the notification, but the only action allowed at this stage will be the revalidation of the notification by the CA that invalidated it
SATISFIED	- CA dispatch considered it properly carried out and - all CAs of transit and CA of destination considered it properly completed	- All CAs provide a decision, or - Notifier cancels the notification	- Notifier cannot change anything in the notification, but can cancel it - CAs cannot request additional information or invalidate the notification - CAs can provide a decision on this notification
CANCELLED	Notifier clicks on "cancel notification". This action will be possible when	Not applicable	- No one can change anything in the notification - Notification cannot be "uncancelled"

⁵ If the update was done after the waste producer authenticated the draft notification, the waste producer will need to authenticate it again in order to allow the notifier to submit it.

⁶ All communication between the notifier and the CA that invalidated the notification, that is aimed to ensure that the CA revalidates the notification should happen outside DIWASS.

Status	When does the status start?	When does the status end?	Basic consequences of the status
	notification has statuses: submitted, consented, objected		- In case notification was consented: - it will not be possible to submit new movement documents under given notification. - it will be possible to complete movement documents that were already submitted
CONSENTED	all CAs consented to the notification (irrespective of validity period of each consent)	- any of the CAs updates its decision to “objection” or “withdraws the consent”, or - notifier cancels the notification - notifier marks the notification as completed	- notifier can submit movement documents (but only when all required consents are valid) - notifier cannot change the notification, but can request changes in line with Article 17 WSR - notifier can cancel notification - any of the CAs can update their decisions and reply to notifier’s request for changes in the notification in line with Article 17 WSR
OBJECTED	at least one of the CAs objected to the notification (also through updating initial consent)	any of the CAs issues or updates its decision to “objection”	- notifier cannot submit new movement documents - respective boxes in movement documents that have been already submitted by the notifier can be updated by operators listed in the movement documents (carriers, consignee, facility) - notifier can cancel notification
WITHDRAWN	at least one of the CAs withdrew the consent	The CA that withdrew the consent updates the decision to “Consent”	- notifier cannot submit new movement documents - respective boxes in movement documents that have been already submitted by the notifier can be updated by operators listed in the movement documents (carriers, consignee, facility) - notifier can cancel notification
COMPLETED	Notifier may mark notification as completed when: All the movement documents generated based on a notification have been completed by all	Not applicable	No actions concerning notification (and movement documents based on it) can be performed.

Status	When does the status start?	When does the status end?	Basic consequences of the status
	relevant operators, There will be no more new movement documents submitted under the notification		

Specific instructions

1. Following the login, the user needs to select the fields “**Documents**” and the “**DIWASS Notification procedure**”.

2. Then, the user will see a list of all notification documents that were submitted in DIWASS, in which the operator it represents is involved. The user needs to select a notification document, in relation to which the user intends to submit a request for additional information.

[Please note that the Commission works on improving the readability of this screen, i.e. providing information on notifier, destination facility and type of waste concerned by notification.]

3. Following the selection of a given notification document, the user will see a notification screen containing three tabs:

- Dashboard: summing up the developments for this notification.
- Notification: containing all the details of the notification document.
- Request information: indicating all the requests for additional information provided by the CAs and replies of the notifier.

As soon as the notification is consented to by all relevant CAs, 4 additional tabs will appear:

- Request change: the notifier will be able to request changes of such notification document (Article 17 of the WSR) in this tab and CAs will be able to react to such requests (for details please refer to Chapter 6 Submitting the request for change of notification after consent (Art. 17 WSR))
- Movement: allowing to generate and complete movement documents under this notification (for details please refer to [Chapters 7 – 11](#) of this document)
- Certificate under Article 15(5)WSR: in case the shipment is destined to an interim waste treatment facility, and shipped waste will be subsequently treated by interim or non-interim facility located in the same country, as country of destination, DIWASS will allow for providing certificates confirming treatment of waste conducted by such facilities.
- Facility name - confidential - Art 21 WSR: Article 21 of the WSR obligates the Commission to publish information on shipments of waste, on a monthly basis, in line with template set out in Annex XII to that Regulation. That Annex contains two tables – Table 1 concerns data on notified waste. Footnote 6 to that table specifies the following: "The name of the facility shall be published, unless one of the competent authorities involved in the procedure of prior written notification and consent considers that this name is confidential and therefore shall not be disclosed, in accordance with Union or national law. The competent authority shall provide this information in the systems or software as referred to in Article 27." This tab allows any of the CAs involved in the notification to indicate that name of the waste receiving facility is confidential and shall not be published by the Commission in the overview on shipments of waste. The operators have only a reader access to this tab.

Please note that DIWASS does not provide a specific functionality for the notifier or waste receiving facility to ask the CAs involved in the notification to consider the name of the waste receiving facility as confidential. Such request should be included in the attachments to the notification document.

- If the user would like to check, whether the CAs considered the notification properly carried out / properly completed, the user should click on “**Checking**” in the tab called “Dashboard”.

- If the user would like to see whether the decision was issued by any of the involved CAs, the user should click on “**Decisions**” in the tab called “Dashboard”.

Chapter 3 How a waste producer should authenticate the notification

General note

This chapter provides general instructions on how a waste producer should authenticate the notification. Please note that:

- Authentication process in DIWASS is an equivalent of signing the documents.
- In order to submit a notification document, it needs to be authenticated by all the waste producers listed in box 9 of the notification document.
- In case the notifier changes anything in the notification document after it was authenticated by the waste producer, the waste producer needs to re-authenticate any changes made in the notification document, as DIWASS removes the former authentication of the waste producer.

DIWASS requires this re-authentication, to ensure that the waste producer is aware and agrees to the shipment of waste and its treatment as described in the final draft of the notification.

Specific instructions

1. Following the login and selecting the relevant notification document from the list of all notification documents involving the operator, the user should review the notification. Following that, the user should click “**Authenticate**” at the bottom of the screen.

The screenshot displays the DIWASS notification form for document BE0025000608i. The form is divided into two main sections: '1. Exporter - Notifier' and '2. Importer - consignee'. The 'Exporter - Notifier' section includes fields for Name (WeSolveYourIssueZ), Country (Belgium), comp_reg (XYZABC123), address, contact information, and operator's identifiers (EORI: BE1111111111, National Company Register: XYZABC123). The 'Importer - consignee' section includes fields for Name (BringOnThoselsueZ), Country (Germany), eori (DE2222222222), address, contact information, and operator's identifiers (EORI: DE2222222222, Central Business Register: germanoperator). At the bottom, there is a '3. Notification No.' field and a '3.1. Address of the location from which the shipment starts' section. A green box highlights the 'Authenticate' button at the bottom right of the form.

2. In the pop-out window, the user should indicate what is the role they perform in the organisation of the operator (e.g. proxy, member of the board, president etc.). Then the user should click on “**Confirm**”.

Authentication details

Name	Test USER Fourteen
Date	17/12/2025
E-mail of the person authenticating the submission	env-testuser14@ec-traces.eu
Role of the person authenticating the submission on behalf of the operator in its organisation	

The information on which operators authenticated the notification and when will be displayed in box 17 of the notification document.

17. Exporter's - notifier's / generator's - producer's declaration:

I certify that the information is complete and correct to my best knowledge. I also certify that legally-enforceable written contractual obligations have been entered into and that any applicable insurance or other financial guarantee is or shall be in force covering the transboundary movement.

Chapter 4 Replying to requests for additional information

General note

This chapter provides instructions on replying to a request for additional information submitted by the CA. To be able to submit a such a reply, it is necessary that:

- The notification document is submitted in DIWASS.
- The CA submitted a request for additional information in DIWASS.

Please also note that, in accordance with Article 8 of the WSR:

- As soon as notification document is submitted, only the CA of dispatch can submit a request for additional information.
- Only after the CA of dispatch considers that the notification is properly carried out, the CAs of transit (if any) and destination may submit a request for additional information.
- The expiry of the deadline to submit such a request does not deprive the CA of the right to submit a request for additional information.
- The expiry of the deadline to submit a reply to a request for additional information does not deprive the notifier of the right to submit a reply for such a request.
- The CA may submit three requests for additional information per notification document. DIWASS will not allow to submit more such requests.

Please also note that:

- The notifier will be able to edit the notification as soon as the request for additional information was submitted by any CA.
- The possibility to edit a notification will be closed as soon as the notifier provides a reply for request for additional information.
- The notifier will be able to edit all elements of the notification, except for countries and CAs concerned, and the data of notifier.
- Requests for additional information and notifier's replies will be visible for all the CAs and all operators involved in notification, with the only exception of carriers.

Please note, as well, that the CA may update the request for additional information by changing the “content of the request” or adding an attachment. Such update does not impact the time in which the notifier should reply for such request. Therefore, the CAs should not use this functionality to add additional elements on the substance of the request (but only to extend the time of the reply, or correct typos).

Specific instructions

1. Following the login and selecting the relevant notification document, the user needs to choose the “**Request information**” tab. In the top right corner of the website, the user will see the status of the document and a deadline to perform a specific action.

- Then, the user will see pending request for information. The user needs to click on “**Reply**”, next to the request for information it intends to review and provide answer to.

Please also note that if any of the CAs submitted a request for additional information, the notifier will be able to edit the notification document until it provides a reply to all pending requests.

BE0025000608i SUBMITTED

Deadline for next action ([en] waste.notification.action.description.replytorequest): 10 working days

Please note, that the number of working days provided here concerns any day from Monday to Friday excluding 1 January, 1 May, 15 August, 1 November, 25 December, 26 December. In countries concerned by your notification, the working days may exclude some public holidays. To see the list of public holidays, please visit this website: [http://public.holidays.be](#)

Competent authority concerned:	Date of the request	Content of the request	Date of the reply	Content of the reply	Status	Actions
Competent authority submitting the request Belgium (BE)	17/12/2025	Please provide pictures o ...			REQUESTED	Reply

- Then, in the pop-out window, the user will see the content of the request. The user can provide a reply by filling in the respective “Content of the reply” free text field. The user can also add an attachment by clicking on “+ Add”. The user should also indicate the date of reply. Then, the user should click on “**Next**”.

- Then, the user should indicate what is the role they perform in the organisation of the operator (e.g. proxy, member of the board, president etc.). Then the user should click on “**Confirm**”.

Chapter 5 Cancelling the notification

General note

This chapter provides instructions on cancelling the notification. Notifier may cancel the notification from the moment it was submitted, until the notifier considers the notification completed (see instructions on that in Chapter XXX of this document) [Chapter will be added].

Please note that cancelling the notification cannot be reversed.

When the notification is cancelled:

- No new movement documents can be generated,
- It will be possible for respective carriers, consignee and facility to complete movement documents that were already submitted.

Specific instructions

1. Following the login and selecting the relevant notification document, the user needs to click on the red button “**Cancel notification**” at the bottom of the page.

Chapter 6 Submitting the request for change of notification after consent (Art. 17 WSR)

General note

This chapter provides instructions on how the notifier can request changes in the notification document after it has been consented to, according to Article 17 of the WSR.

Certain information from the consented notification is automatically transferred to the movement document, as explained in Chapter 7 How to submit a movement document. This information cannot be amended directly in the movement document. If a change is required, such as adding an additional carrier, the notifier must first request an amendment to the notification.

Please, note that:

- Such request can be submitted only by the notifier;
- Such request can be submitted only when the status of the notification is “Consented”;
- Only when all the CAs involved in a notification approve such request in DIWASS, these CAs will be able to insert the actual change into the consented notification⁷;
- Only when such change is introduced, the updated data can be used by the notifier when filling in the movement documents.

Please also note that changes introduced in result of such request cannot cover:

- Countries concerned by notification;
- CAs concerned by notification;
- Notifier.

Specific instructions

1. Following the login and selecting the relevant notification document, the user needs to click on tab “**Request change**”.

The screenshot displays the DIWASS interface for a notification document with ID BE0025000090i. The status is 'CONSENTED'. The 'REQUEST CHANGE' tab is highlighted. Below the tabs, a table shows the notification details:

Notification - CONSENTED - BE0025000090i					
Main actors	Country/Name	Checking		Decisions	
Notifier	BE (BE)	Submission Date	29-10-2025	Last update on	29-10-2025

				Decision type	CONSENT
Movement	Movement :		Quantities :		

2. Then, the user needs to click on the “**+ Add request change**” tab.

⁷ See also Article 17(14) of DIWASS Implementing act.

3. A pop-out window will appear. The user needs to:

- Indicate whether the change concerns the route of the shipment, by selecting Yes or No; and
- Indicate the content of the request by providing text in the “Request content” field.

The user may also add an attachment by clicking “+ **Add**”. Then the user needs to click on the grey field “File” to select the relevant file.

Chapter 7 How to submit a movement document

General note

This chapter explains how the notifier should submit a movement document in DIWASS.

The following conditions and limitations apply:

- The notification must have the status “Consented”.
- Only the notifier can submit a movement document.
- The movement document must be submitted at least two working days before the planned shipment. DIWASS will not allow a document to be created if the actual shipment date is the same as the submission date or the following day.
- Waste producers do not need to authenticate the movement document before submission. They will have read-only access to submitted movement documents.
- New movement documents cannot be generated once the consent has expired or been revoked. However, movement documents already submitted may still be updated by the relevant carriers, consignee and facility, where applicable.

DIWASS automatically copies certain information from the consented notification into the movement document template. This information cannot be changed directly in the movement document. If it needs to be amended, the notifier must first request a change to the consented notification. For further instructions, see Chapter 6 Submitting the request for change of notification after consent (Art. 17 WSR).

DIWASS also prevents the notifier from:

- Submitting more movement documents than the total number of intended shipments allowed under the consented notification, including any specific conditions set out in the CAs’ decisions, where applicable⁸;
 - Please note that cancelled movement documents are not counted towards this limit. Example: if a consented notification allows 15 shipments, DIWASS will allow 15 movement documents to be submitted. If the notifier cancels movement document 013, DIWASS will allow movement document 016 to be generated and submitted.
- Submitting movement documents for quantities of waste that exceed the quantity allowed under the consented notification, including any specific conditions set out in the CAs’ decisions, where applicable⁹;

⁸ Please note that DIWASS will enforce this restriction only when the CA provides a lower number of shipments in a specific field in the decision box concerning the total number of shipments under a notification. If such requirement is provided only as text in free text field or in the attachment added to the decision, DIWASS will not recognise it.

⁹ Please note that DIWASS will enforce this restriction only when the CA provides a lower quantity of waste to be shipped in a specific field in the decision box concerning the total quantity of waste to be shipped under a notification. If such requirement is provided only as text in free text field or in the attachment added to the decision, DIWASS will not recognise it.

- DIWASS compares the total quantity of waste allowed under the notification with the quantity entered by the notifier in box 5 of the movement document;
- For general notifications covering multiple shipments, DIWASS adds together the quantities entered by the notifier in box 5 of all submitted movement documents and compares the total with the quantity authorised in the consented notification;
- The consignee and facilities may enter higher or lower quantities in their respective boxes, based on the quantities actually received. DIWASS will not automatically compare those values with the quantities authorised under the notification.

Each movement document is assigned a specific status. The table below explains these statuses.

Table 2. Statuses of movement document in DIWASS

Status	When does the status start?	When does the status end?	Basic consequences of the status
DRAFT	Notifier saves a draft	Notifier submits the movement document	Only the notifier can see and edit the draft.
ANNOUNCED	Notifier submits the movement document	• Notifier cancels the movement document, or • Carrier confirms the transport of waste, or • Confirmation of receipt of waste is submitted, or • Facility submits certificate confirming the receipt of waste, or • CA submits the request to take the waste back.	All the CAs and waste producers indicated in the consented notification can see the movement document. The selected operators (selected carrier, consignee and facility) can contribute to the movement document by filing in their respective boxes. Notifier can update the movement document.
MOVING	Carrier submits the transport confirmation	• Confirmation of receipt of waste is submitted, or • Facility submits a certificate confirming the receipt of waste, or • CA submits the request to take the waste back.	CA can submit take back request. The selected operators (carrier, consignee and facility) can contribute to the movement document by filing in their respective boxes. Notifier can no longer update the movement document.
CANCELLED	Notifier cancels the movement document	Not applicable	This movement document cannot be updated any more. The notifier can perform this operation only when the status of movement document is “Draft” or “Announced”.

Status	When does the status start?	When does the status end?	Basic consequences of the status
RECEIVED	Consignee / Facility provides a confirmation of receipt	- Facility submits certificate confirming the receipt of waste, or - CA submits the request to take the waste back.	Notifier can no longer update the movement document. CA can submit take back request. The selected operators (selected carrier, consignee and facility) can contribute to the movement document by filing in their respective boxes.
COMPLETED	Certificate confirming completion of treatment of waste is submitted	CA submits the request to take the waste back	Notifier can no longer update the movement document. CA can submit take back request. No other operator can contribute to this movement document.
TAKE-BACK	CA submits a take back request	Not applicable	This request can be submitted when movement document is in statuses "Announced", "Moving", "Received" and "Completed".

Specific instructions

1. Following the login and selecting the relevant notification document from the list of all notification documents involving the operator, the user should click on the **“Movement”** tab.

The screenshot shows the 'Movement' tab selected in the navigation bar. The interface displays a notification document titled 'Notification - CONSENTED - BE0026004639i'. Below the title, there are sections for 'Main actors' and 'Decisions'. The 'Main actors' section includes fields for Notifier, Dispatch, Transit, and Destination, each with a country code and a date. The 'Decisions' section includes fields for Acknowledgement date, Decision date, and Decision type. The 'Movement' section includes fields for Movement and Quantities. Below this, there is a table for 'Movement' with columns for Sequence number, Shipment date, Carriers, and Facilities. The table contains one row with the following data:

Sequence number	Shipment date	Carriers	Facilities
1	24-04-2026		German Waste Management Facility S.A. Reception: Completion: Quantity: (m3 t)

2. Then, the user should click on **“Create movement document”**.

The screenshot shows the 'Create movement document' button highlighted in the interface. The button is located in the top right corner of the movement document list. The list contains one document with the following details:

Movement document number	Shipment date	Sequence number	Quantity of waste covered by movement document	Status
BE0026004639i.000001MOV	24/04/2026	1	MASS 100 T	ANNOUNCED

3. Following that, the user will see a new template of the movement document displayed in the list of movement documents, in status “New”. To fill it in, the user needs to click in the icon next to the relevant movement document, on the right side of the screen.

< BE0026004639i CONSENTED

Movement	Movement :		Quantities :		

Movement

Next, the user needs to select, from the list of movement documents, the relevant draft movement document. To edit this draft, the notifier needs to click on the icon on the right side of the screen, next to the selected movement document.

Following that, the movement document template will be opened. On top of the screen, the user will see a movement document menu, providing a possibility for the user to:

- Cancel a movement document – by clicking “Cancel”,
- Save changes – by clicking “Save”
- Authenticate it – by clicking “Authenticate” (this step is explained further in this document)
- Print it – using this possibility the user will be able to extract the movement document into a pdf format.

In order to fill in the movement document, the user needs to scroll down a bit, to see the boxes of movement document.

6. DIWASS displays the template of movement document with some fields already filled in. Data displayed in these fields is copied from the consented notification, and these fields cannot be changed at the level of the movement document¹⁰.

The notifier will be asked to provide only information specific to the movement document, as explained below.

¹⁰ As indicated in the General note of this Chapter, changing data in the consented notification is explained in [Chapter 6 Submitting the request for change of notification after consent \(Art. 17 WSR\)](#).

7. **Box 2a. Container identification number:** the user should provide, in the free text field, the container identification number, if such number exists.

1. Corresponding to Notification No. BE0026004639i	2. Serial / Total number of shipments 2 / 100
2a. Container identification number, if applicable XX256	2b. Source details in relation with movement document no: due to take-back* ☐ Yes ☐ No due to detection of illegal activity* ☐ Yes ☐ No

8. **Box 2b. Source details:** In case a movement document is a) linked with another movement document (also submitted under a different notification), b) created due to take-back or due to detection of illegal activity, the notifier should provide such information by filing in the correct boxes.

1. Corresponding to Notification No. BE0025000228i	2. Serial / Total number of shipments 3 / 100
2a. Container identification number, if applicable 	2b. Source details in relation with movement document no: due to take-back* ☐ Yes ☐ No due to detection of illegal activity* ☐ Yes ☐ No

9. **Box 5. Actual quantity:** the user should provide the actual quantity of waste that is to be shipped based on the movement document. Please note that this information needs to be provided using the same unit of measure (Mg / m³) as provided for in the consented notification. The user needs to click on “+ Add”.

5. Actual quantity* + Add	6. Actual date of shipment* --/-- 📅
---	---

Then, in free text box, the user should provide an actual quantity of waste to be shipped under the movement document.

5. Actual quantity* Mass: Value: 0 Unit: Tonnes (Mg) ✕ + Add	6. Actual date of shipment* --/-- 📅
---	---

DIWASS considers the fact that the notifier provides in this box the estimated actual quantity of waste to be shipped under a movement document. The facility can provide in their respective boxes different quantities – higher and lower – based on the actual measurements.

10. Box 6. Actual date of shipment: the user needs to click on the calendar icon and select the actual date of shipment.

Please note that DIWASS will not allow to submit a document indicating as date of the actual shipment the date on which the movement document is submitted, or the next day, as it will require to respect the obligation arising from Article 16(2) of the WSR to submit a movement document two working days in advance of the planned shipment.

11. Box 7. Packaging: The user needs to select packaging types by clicking “+ Add” and selecting relevant type or types of packaging. The user should also indicate the number of packages and if there are any special handling requirements for the shipped waste. The user may also provide a packaging description in the free text box.

Please note that, in principle, information provided in this field should be the same as provided for in the consented notification. However, to provide the notifier with more flexibility, DIWASS

does not copy this field from the notification document. Therefore, in exceptional cases, when the notifier used different packaging than indicated in the consented notification, this could be reflected in this box of the movement document.

Similarly, if the notifier considers that additional description or special handling requirements should be added, this information should be provided at the level of the movement document.

12. Box 8. Transport carrier(s): the user should select the carriers for the shipment of waste. Choice of carriers is limited only to the carriers that have been added at the notification level¹¹.

If the consented notification includes only one carrier, DIWASS automatically adds that carrier to the movement document. The user does not need to complete this box.

8. Transport carrier(s)

Name	Main identification number	E-mail	Address	Country	Means of transport
 French Carrier Company S.A.	-	ericwalter.rosenthal@g...	Paris	 (FR)	 T
Id	Transfer Date	Means of Transport	Attachments	Actions	

If the consented notification lists more than one carrier, the user must select the carrier or carriers for the movement document. To do this, the user should choose them from the list in **Box 8a** by clicking the “+” icon.

8.a. Carriers indicated in notification document

Name	Main identification number	Means of transport	
WASTE FR Test Carrier 1	 EORI:FR0909	 T	
DIWASS Video Company 1	 EORI:BE987987123123	 R	
DE DIWASS GUI TEST COMPANY	 EORI:DE012304560789	 T	

8.b. Carriers involved in shipment of waste covered by this movement document

Name	Main identification number	Means of transport
------	----------------------------	--------------------

The user can add one or more carriers in this step. If a carrier was chosen by mistake, the user could remove it by clicking the icon “–” in **Box 8b**.

¹¹ As indicated in the General note of this Chapter, changing data in the consented notification, including adding new carriers, is explained in [Chapter 6 Submitting the request for change of notification after consent \(Art. 17 WSR\)](#).

Authentication details

Name	Test USER Fourteen
Date	13/05/2026 
E-mail of the person authenticating the submission	env-testuser14@ec-traces.eu
Role of the person authenticating the submission on behalf of the operator in its organisation *	

16. Following that step, DIWASS will again display the dashboard summarising details of the notification document. To continue working on the movement document, the user needs to click once again on the **“Movement”** tab, and then select the relevant draft from the list. The user will also see an icon of green tick sign, confirming that the movement document authenticated the movement document. To proceed with submission of that document, the user needs to click on the edit icon on the right part of the screen.

Chapter 8 How to update a movement document

General note

This chapter provides general instructions on how a notifier can update the movement document.

Please note that:

- In order to update a movement document, the document needs to be in status “Announced”
 - If the carrier, consignee or facility completes their respective boxes in notification document, the document status would be changed (to “Moving”, “Received” or “Completed”) and the notifier will not be able to update it anymore;
 - If the CA submits take-back request, the notifier will not be able to update the movement document anymore;
- DIWASS will allow to update only the boxes of a movement document that the notifier could fill in when submitting a movement document (i.e. boxes 2a, 2b, 5, 8, and 16);
 - The notifier will not be able to update box 6 of the movement document, concerning the actual date of shipment;
 - The update covers both: adding additional text in the movement document and changing the text that has been provided in those boxes of movement documents;
- Only the notifier can update a movement document – this action cannot be done by CAs.

Please also note that DIWASS will always display the most up-to-date version of the movement document.

Specific instructions

1. Following the login and selecting the relevant notification document from the list of all notification documents involving the operator, the user should select the “**Movement**” tab.

Chapter 9 Contribution of carrier to a movement document

General note

This chapter provides general instructions on how a **carrier** can contribute to the movement document.

Please note that:

- Only carriers selected by the notifier for the relevant movement document can see and contribute to that document;
- Such carrier(s) will be able to see the movement document only after the notifier submits (announces) it in DIWASS;
- The carrier will be able to contribute to the movement documents when the document will be in one of the following statuses: “Announced”, “Moving” and “Received”;
- In case where in a given shipment of waste there is more than one carrier involved, DIWASS will allow all the carriers to contribute to the movement document in any order.
 - Example: Movement document lists three carriers: A, B and C. Carrier C can fill in the movement document in DIWASS even if carriers A and B have not yet contributed to that movement document.
- Movement documents cannot be generated after the consent for the shipment is revoked or expired. However, already submitted documents can still be updated by carriers, the consignee, and the waste receiving facility.

Specific instructions

Confirming the transfer of waste

1. Following the login and selecting the relevant notification document from the list of all notification documents involving the operator, the user should click on “**Movement**”.

The screenshot displays the DIWASS interface for notification BE0026004639i. The top navigation bar shows the status as 'CONSENTED'. The main menu includes options like DASHBOARD, NOTIFICATION, REQUEST INFORMATION, REQUEST CHANGE, MOVEMENT (highlighted), CERTIFICATE UNDER ARTICLE 15, and FACILITIES CONFIDENTIALITY. The 'MOVEMENT' section is active, showing a table of movement data.

Notification - CONSENTED - BE0026004639i

4. Next, a pop-out window will open. The user needs provide information on:
- The date of the transfer of waste – by clicking on the **calendar icon** and selecting relevant date;
 - Means of transport used by the carrier – by selecting it from the drop-down list.

If needed, the user may indicate additional information relevant for the shipment of waste by completing a free text field.

The screenshot shows a web interface for 'Carrier transfer confirmation'. It features a header with a blue circle containing a white menu icon. Below the header, the title 'Carrier transfer confirmation' is displayed. The form contains three fields: 'Date of transfer *' with a date picker icon, 'Means of transport *' with a dropdown arrow, and 'Additional information:' with a large text area. A blue button labeled '+ Add attachment' is located at the bottom right. Green rectangular highlights are placed around the date picker, the transport dropdown, and the additional information text area.

The user may also add an attachment by clicking on “+ Add attachment”.

This screenshot is identical to the previous one, showing the 'Carrier transfer confirmation' form. However, a green rectangular highlight is placed specifically around the blue '+ Add attachment' button at the bottom right of the form.

A pop-out screen will appear, where the user can choose the attachment type, select the file, and specify whether it contains personal data or not. If needed, the user can also add a comment about the file. Click “**Add**” to upload the file.

Chapter 10 Contribution of consignee to a movement document

General note

This chapter provides general instructions on how a **consignee** should submit the movement document. Please note that:

- The consignee will be able to see the movement document only after the notifier submits (announces) it in DIWASS;
- The consignee will be able to contribute to the movement documents when the document will be in one of the following statuses: “Announced”, “Moving” and “Received”;
- Movement documents cannot be generated after the consent for the shipment is revoked or expired. However, already submitted documents can still be updated by carriers, the consignee, and the waste receiving facility.

To verify its contribution to the movement document, the user needs to click once again on the **“Movement”** tab, and then select the relevant document from the list in order to review it.

Chapter 11 Contribution of waste receiving facility to a movement document

General note

This chapter provides general instructions on how a **waste receiving facility** should submit the movement document. Please note that:

- The waste receiving facility will be able to see the movement document only after the notifier submits (announces) it in DIWASS.
- The waste receiving facility will be able to contribute to the movement documents when the document will be in one of the following statuses: “Announced”, “Moving” and “Received”.
- Movement documents cannot be generated after the consent for the shipment is revoked or expired. However, already submitted documents can still be updated by carriers, the consignee, and the waste receiving facility.

Specific instructions

Confirming the receipt of waste

1. Following the login and selecting the relevant notification document from the list of all notification documents involving the operator, the user should click on the **“Movement”** tab.

4. In the next window, the user needs to provide information on
- The date of the receipt of waste – by clicking on the **calendar icon** and selecting the relevant date;
 - Accepted quantity of waste – by clicking on icon “+ Add”, selecting the unit of measure and filling in a free text field;
 - Please note that in the future DIWASS may restrict the choice only to the unit of measure indicated in the notification.
 - Rejected quantity of waste – by clicking on icon “+ Add”, selecting the unit of measure and filling in a free text field;
 - Please make sure to enter “zero” if no waste was rejected.
 - Please note that in the future DIWASS may restrict the choice only to the unit of measure indicated in the notification.
 - Reasons for rejection – by completing the free text field;
 - Please make sure to enter “not applicable” in case no waste was rejected.
 - Approximate date of disposal/recovery – by clicking on the **calendar icon** and selecting relevant date.

Certificate details

Facility reception certificate

Facility reception date: * 25/06/2026

Accepted quantity of waste: *

Mass: Value: 98 Unit: Tonnes (Mg)

Rejected quantity of waste: *

Mass: Value: 0 Unit: Tonnes (Mg)

Rejection reason: *

Approximate date of disposal/recovery: * 02/07/2026

Then, the user needs to provide information by completing the following free-text fields:

- Designation and composition of the waste received;
- Facility actual site; and
- Additional information relevant for shipment of waste, if needed.

Designation and composition of the waste received: *	as indicated in the notification
Facility actual site: *	as indicated in the notification
Additional information:	

The user should also provide contact information concerning the waste receiving facility, by filling in the free-text fields.

Contact details:	Contact Person Name: *	
	Telephone Number: *	
	E-mail: *	@gmail.
	Fax Number:	
	WebSite:	

The user may also add an attachment by clicking on “+ Add attachment”.
